

FOAMplus[®] 5504R

RESISTANT, ROBUST AND ENVIRONMENTALLY FRIENDLY

FOAMplus® 5504R IS HIGH-QUALITY PACKAGING FOAM WITH RECYCLED CONTENT.

With the new FOAMplus® 5504R, you not only rely on a tried-and-tested packaging solution that protects your goods during transport and can be used multiple times. You also rely on environmentally friendly material: FOAMplus® 5504R consists partly of a material obtained by recycling polyurethane. This

makes it the first foam with recycled content in the packaging industry. And with just 4.2 kilogram per cubic meter, FOAMplus® 5504R delivers reliable product protection at your fingertips, is extremely lightweight while providing optimum performance for void fill applications and cushioning of lightweight items.

RECYCLING POLYURETHANE

Polyurethane waste and residues from industry or the consumer are processed in recycling plants: the result is recycled raw materials deployed in the production of polyurethane foams. They have similar material properties as the original ones and can be further processed into high-quality protective packaging.

LIGHTWEIGHT AND STABLE

Individual and particularly lightweight protective packaging that adapts to the contours of the packaged goods and reliably absorbs shocks – these are FOAMplus® foam cushions. For this purpose, two liquid components are mixed and then expand to (H)CFC-free polyurethane with a special cushioning effect – for the perfect protection of your products.

STOROPACK – PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

FOAMplus® IS HIGH-PRECISION PACKAGING, LIGHT AS A FEATHER.

Our FOAMplus® packaging system optimally protects your products thanks to padding made of shock-absorbing polyurethane. Storopack's foam packaging is light and therefore eco-friendly, reduces transport costs, and can be reused for the same products.
