

SUSTAINABILITY MEANS
THINKING ABOUT TOMORROW,
TODAY.

SUSTAINABILITY IN STOROPACK'S PACKAGING DIVISION

Sustainability encompasses many aspects. Whether environmental, economic, or social issues, the underlying principle is the same, i.e. to live in a way that enables future generations to have a life that is just as good as – or even better than – our own. As a family-run company, we take these principles extremely seriously. That's why they guide our decisions and our day-to-day activities.

SUSTAINABLE AND RESOURCE-SAVING PRODUCTS

Sustainable raw materials are a great way to protect the environment and natural resources. Therefore, our product-development experts are increasingly using suitable renewable or recycled materials for our products.

Products from renewable raw materials:

AIRplus® Bio, PAPERplus® Classic Grass, PAPERplus® paper cushioning, PELASPAN® Bio

Products from recycled raw materials:

AIRplus® 100% Recycled, AIRplus® Recycle, FOAMplus® 5504R, PAPERplus® recycled paper, PELASPAN®

35%

In 2020, more than 35% of our in-house manufactured products were made from renewable or recycled materials.

INTERNAL INITIATIVES

Acting sustainably begins long before we turn raw materials into our products. The equipment at our locations also plays a major role when it comes to protecting resources. Therefore, we take various internal measures to optimize our carbon footprint and ensure efficient energy management.

COLLABORATIVE INITIATIVES

50%

Our goal for 2025:
Using at least 50% raw materials made from recycled or renewable resources.

STOROPACK – PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

SUSTAINABILITY MEANS RELYING ON INNOVATIVE SOLUTIONS.

Our mission is to provide perfect protective packaging and first-class molded parts. For this purpose new, more sustainable raw materials are a great way to protect the environment and natural resources. This is why many of our products are made using renewable or recycled materials and can be recycled after use.
