

SUSTAINABILITY MEANS
THINKING ABOUT TOMORROW,
TODAY.

SUSTAINABILITY AT STOROPACK

Sustainability encompasses many aspects. Whether environmental, economic, or social issues, the underlying principle is the same, i.e. to live in a way that enables future generations to have a life that is just as good as – or even better than – our own. As a family-run company, we take these principles extremely seriously. That’s why they guide our decisions and our day-to-day activities.

ENVIRONMENTAL POLICY

Our products are made of virgin raw materials or where possible with up to 100 % post consumer recycle content. We already generate approximately 25 percent of our sales with products made from recycled or renewable raw materials. This is a very high number in our industry.

25%

of our sales are generated with products made from recycled or renewable raw materials.

PRODUCTS MADE FROM RENEWABLE OR RECYCLED RAW MATERIALS

Sustainable raw materials are a great way to protect the environment and natural resources. Therefore, our product-development experts are increasingly using suitable renewable or recycled materials for our products. Products from renewable resources: PAPERplus® Classic Grass, AIRplus® Bio, Pelaspan® Bio, PAPERplus® paper pads. Products from recycled raw materials: AIRplus® Recycle, FOAMplus® 5504R, PAPERplus® recycled paper.

WE ARE PART OF:

STOROPACK – PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

SUSTAINABILITY MEANS TRUSTING NATURE.

New, more sustainable raw materials are a great way to protect the environment and natural resources. This is why many of our products are made using renewable or recycled materials and can be recycled themselves after use.
